Table of Contents

About the Author	vii
About This Book.....	ix
Chapter 1: Introduction.....	1
Why Learn Coding?	1
Coding vs. Programming.....	2
On HTML and CSS	3
Why Learn JavaScript?	4
Why Do We Have Different Languages?	6
Learning JavaScript with p5.js	8
Chapter 2: Getting Started	13
Installing p5.js.....	13
Gentle Introduction to JavaScript.....	16
Getting Started with p5.js	24
More About Functions	26
Coordinates in p5.js	31
Summary.....	35
Practice.....	36
Chapter 3: Colors in p5.js	37
Color Functions in p5.js	37
Changing Shape Colors.....	39

TABLE OF CONTENTS

Summary.....	42
Practice.....	42
Chapter 4: Operators and Variables.....	45
Setup.....	45
Variables.....	47
Variables Continued.....	49
Predefined Variables in p5.js.....	55
Summary.....	58
Practice.....	59
Chapter 5: Conditional Statements and Comparison Operators.....	61
frameCount, frameRate, and frame.....	61
Conditionals.....	66
Summary.....	75
Practice.....	76
Chapter 6: More p5.js Variables.....	77
moueslsPressed.....	77
mouseX and mouseY.....	80
Summary.....	83
Practice.....	84
Chapter 7: Loops.....	85
For Loop.....	85
Random and Noise Functions.....	92
Summary.....	99
Practice.....	100

Chapter 8: Functions	101
Creating Functions	101
Revisiting Setup and Draw Functions	107
Summary.....	108
Practice.....	108
Chapter 9: Objects	109
Using Object Initializer	109
Using the Constructor Function.....	117
Summary.....	123
Chapter 10: Arrays.....	125
Using the push Method	125
Using Arrays.....	133
Using the remainder Operator.....	136
Summary.....	141
Practice.....	141
Chapter 11: Events	143
Using mousePressed	143
Using keyPressed	145
Summary.....	151
Practice.....	151
Chapter 12: More on p5.js	153
Rotate and Translate	153
Push and Pop	159
Summary.....	164
Practice.....	165

TABLE OF CONTENTS

Chapter 13: Final Project	167
Getting Started	168
User Interaction.....	176
Keeping the User Score	181
Final Code	198
Summary.....	208
Appendix: Final Words	209
Where to Go Next	210
Additional Resources	212

About the Author

Engin Arslan is a Software Developer with a Bachelor of Science in Materials Engineering and a Postgraduate Degree in Visual Effects. Before becoming a Developer, he worked as a Visual Effects Artist / Technical Director on films and TV shows including *Resident Evil*, *Tron*, *Mama*, *Pompeii*, *Vikings*, and *Strain*. He received an Emmy nomination and won a Canadian Screen Award for his achievements in Visual Effects. During his time in VFX, he fell in love with Python and with programming in general. As a result, he changed careers to be able to immerse himself completely in software development. Engin currently works at a Toronto-based digital services company, where he helps develop solutions in strategic problem spaces using emerging technologies. He also works at Seneca College as a part-time professor and creates online courses for Lynda/LinkedIn and Pluralsight.

About This Book

The emphasis of this book will be primarily on learning programming using JavaScript and p5.js and secondarily in creating visuals. The main focus is to teach you how to program so that you can choose to pursue whatever field that you would like with your newly established skill set. The skills that you will acquire from this book are highly transferrable and can be used with whatever you choose to build: whether web applications, programmable robots, or generative art. This means that I will provide you with enough context so that you can build a strong foundation for programming. But I also won't hinder your momentum with irrelevant technical or theoretical points. The aim is to build a strong but a minimum viable knowledge to get you running with coding. This is the book that I wished I had available when I was learning coding myself.

If you are an artist or a visual designer, this book is perfect for you as you might find the examples we will be building to be directly relevant to your work. If not, this is still a great book for learning programming as the visual nature of the exercises will help you grasp the fundamentals of programming more easily and let you build a strong foundation in a shorter amount of time.

This book will present various JavaScript and p5.js features and concepts in the following chapters. The knowledge will be reinforced by building several useful examples like an animation and a data visualization; and as a final project, we will be building a game that can be deployed online using what we learned in this book!

ABOUT THIS BOOK

Here is a rundown of the topics that we will be covering:

Chapter 1 - Introduction: Provides an overview of coding versus programming.

Chapter 2 - Getting Started: We will learn some very basic JavaScript commands and operations to get started with using p5.js.

Chapter 3 - Colors in p5.js: This will be a p5.js-specific chapter where we learn about how colors are defined and used in p5.js. This doesn't pertain to JavaScript but needs to be explored regardless to be able to use p5.js in a comfortable manner.

Chapter 4 - Operations and Variables: We will make use of the JavaScript knowledge we acquired in the second chapter in p5.js context.

Chapter 5 - Conditional Statements and Comparison Operators: This chapter will allow us to write programs that can respond to different conditions by using conditionals and comparison operators.

Chapter 6 - More p5.js Variables: This will be another p5.js-specific chapter where we will learn about several library-specific variables.

Chapter 7 - Loops: Here we will learn about loops, which will allow us to build programs that handle enormous amounts of calculations.

Chapter 8 - Functions: Functions are the building blocks of JavaScript and we will learn more about them in order to build more scalable, modular, and robust programs.

Chapter 9 - Objects and **Chapter 10 - Arrays:** Objects and Arrays are JavaScript data structures that will allow us to organize our code and handle complexity in more intelligent ways.

Chapter 11 - Events: Event handling will allow us to write programs that handles user interaction.

Chapter 12 - More on p5.js: Another p5.js-only chapter where we learn more about library-specific features before diving into our final project.

Chapter 13 - Final Project: We will build a game using everything we have learned up to this chapter!
